THE SECOND SCIENTIFIC CONFERENCE

ONE HEALTH HORIZONS

Collaborative Solutions for Emerging and Re-emerging Infections

— INTERNATIONAL —

| COLLABORATIVE —

25 – 26 NOVEMBER 2026

Baghdad Medical City • University of Baghdad • Bait Alhikma

ABOUT THE CONFERENCE

The Iraqi Infectious Diseases Society (IIDS) is proud to host its Second Scientific Conference, a major national and international meeting bringing together clinicians, microbiologists, researchers, epidemiologists, and public health professionals under the “One Health” concept. The conference addresses the growing importance of multidisciplinary collaboration in tackling emerging infectious threats, antimicrobial resistance, climate-related diseases, and global outbreak preparedness.

CONFERENCE OBJECTIVES

- Promote scientific exchange in infectious diseases and microbiology.
- Strengthen collaboration between clinicians, microbiologists, researchers, epidemiologists, and public health professionals.
- Highlight emerging infectious threats affecting Iraq and the region.
- Encourage research, innovation, and evidence-based practice.
- Enhance awareness of antimicrobial resistance and infection prevention.
- Support young researchers through workshops and scientific presentations.
- Promote the “One Health” concept in Iraq and the Middle East.

FORMAT & VENUE

- A two-day scientific meeting, 25–26 November 2026.
- Venues: Baghdad Medical City, University of Baghdad, and Bait Alhikma for workshops and social events.
- Hybrid participation is available for selected international speakers and workshops.

Finance Committee

Chaired by Prof. Dr. Sinan Bahjat Issa

الاستاذ الدكتور سنان بهجت عيسى

رئيس اللجنة المالية

#	Name	الاسم (عربي)
1	Prof Dr. Hasanain Faisal Ghazi	الاستاذ الدكتور حسنين فيصل غازي
2	Lect. Dr. Zahraa Abdulaziz Yousif	المدرس الدكتورة زهراء عبد العزيز يوسف
3	Asst. Lecturer. Marwa Ghanim Hashim	المدرس المساعد مروة غانم هاشم

MAIN SCIENTIFIC THEMES

The following scientific themes are proposed for keynote lectures, oral presentations, poster sessions, and abstract submissions:

A

One Health, Climate Change, and Emerging Infections

- Climate change and infectious disease epidemiology
- Emerging and re-emerging infections
- Vector-borne and zoonotic diseases
- Environmental drivers of outbreaks

B

Antimicrobial Resistance (AMR)

- Multidrug-resistant organisms
- Antimicrobial stewardship
- AMR surveillance and diagnostics
- Hospital-acquired infections
- Novel antimicrobial therapies

C

Sepsis and Critical Infections

- Sepsis in immunocompromised patients
- Fungal and opportunistic infections
- ICU-related infections
- Diagnostic challenges in severe infections
- Advances in sepsis management

D

Vaccines and Preventive Infectious Diseases

- Adult and childhood immunization
- Vaccine hesitancy
- New vaccine technologies
- Public health vaccination strategies
- Pandemic preparedness

E

Endemic, Tropical, and Neglected Diseases

- Tuberculosis
- Brucellosis
- Leishmaniasis
- Malaria and arboviral diseases
- Neglected tropical diseases in Iraq and the Middle East

F

Sexually Transmitted Infections

- HIV updates and regional challenges
- Syphilis and re-emerging STDs
- Viral hepatitis
- Screening and prevention programs

G**Artificial Intelligence and Digital Health in Infectious Diseases**

- AI-assisted diagnostics
- Predictive outbreak modeling
- Digital epidemiology
- Big data and infection surveillance

H**Translational and Precision Infectious Diseases**

- Metagenomics and molecular diagnostics
- Pharmacogenetics in antimicrobial therapy
- Precision medicine approaches
- Genomic sequencing and outbreak tracking
- Translational infectious disease research

I**General Infectious Diseases Topics**

- Additional abstracts and presentations related to infectious diseases, microbiology, infection prevention, epidemiology, and public health are also welcomed.

WORKSHOPS

Practical and educational workshops will run in parallel with the main scientific sessions.

A**Laboratory Sequencing and Molecular Diagnostics Workshop**

- Collaboration with Baki University and Iraqi laboratory teams.
- Possible hybrid delivery format.
- Focus on sequencing technologies, PCR applications, and molecular epidemiology.

B**Infection Prevention and Control Workshop**

- Hospital infection prevention strategies.
- Hand hygiene and outbreak containment.
- AMR-related infection control measures.

C**Research Methodology Workshop**

- Focus on systematic reviews and meta-analysis.
- Research design and critical appraisal.
- Scientific writing and publication skills.

WORKSHOP NOTES

- Workshops will run over the two conference days.
- Each workshop session will not exceed 90 minutes.
- Timing will be arranged to avoid overlap with keynote lectures and major scientific sessions.
